

## **Report Re Llwybr Llygoden, 87/23 slips and falls**

The steps on 87/23/2 (below Allt Fach) especially those below the spring are very slippery and greenish.

St Dogmaels Footpath Association have over 2022 had 5 working parties to keep Llwybr Llygoden clean and tidy.

However recently there have been a couple of falls due to the slipperiness of the steps, the most slippery being the smooth concrete ones that do not have grooves cut into them.

I asked Emrys Llewelyn, in charge of Urban Footpaths, PCC, if there was something that could be done to reduce the risk of slips.

Emrys Llewelyn, will get his supervisor to check the steps and let us know what can be done.

In the meantime St Dogmaels Footpath Association will cut back overhanging vegetation so the path can dry out a bit better
