

10.1.1 Request in principle to proceed with seeking information about updating the 'Map Panels' in St Dogmaels Main Car Park.

Issue

PCNPA are updating St Dogmaels Footpath Association's map panel at Poppit Sands Car Park, with new footpath links.

St Dogmaels Footpath Association could request PCNPA to create a second copy with few changes for St Dogmaels Car park (possibly funded by St Dogmaels Footpath Association depending on cost)

The dimensions would be 900mm wide x600mm high.

This will not fit on the toilet block wall, but could replace the HANES map earmarked for replacement which is 118mm x83mm

The proposed new panel would require legs and frame.

Perhaps these could also be sourced from PCNPA as panels 900x600 are their standard size

This could free up the space on the toilet block wall to have a detailed map of St Dogmaels as St Dogmaels Footpath Association has on the back of the folding map.

Relevant detail updating the sites identified on the HANES map can be depicted.

The detailed village map could be jointly created with St Dogmaels Footpath Association, the Community Council and others bodies as appropriate

The Request is for support in principle to explore the possibilities, identify costs and report back to the Community Council and St Dogmaels Footpath Association's
